after successfully archiving 50 live-streams within almost 5 years of p45 radio, it's time to progress. while p45 records irrevocably goes and dub\_ex\_machina rapidly grows, comfortnoise is our steady base.

as from now, we continue our monthly streams over audioasyl under the name „comfortnoise podcast“, while [www.comfortnoise.com](http://www.comfortnoise.com) is the preferred site to place essential information. watch out for the upcoming relaunch right here!

what you shall get are proved and well selected sounds of high quality in the vast field of advanced dub related electronic music. we'll of course welcome national and international guests as well. whatever, just trust your ears!

comfortnoise is a worldwide thing that operates as a network of enthusiastic participants. without good friends, precious supporters and attentive listeners, dj new.com as the man in charge would be struck - thank you folks, you're brilliant!
